

# The *InstyMeds* System

for Dispensing Outpatient  
 Prescription Medications *24 Hours a Day,  
 Seven Days a Week*

fast

*InstyMeds* provides a turnkey solution for patient care facilities that have staff constraints and are budget-sensitive. The System is also a great solution for underserved communities that lack 24/7 pharmacy availability. It is a complete outpatient prescription medication system that includes multiple safety checks to provide fast, convenient, accurate dispensing every time.

convenient

HERE'S HOW IT WORKS:

**1 At registration**

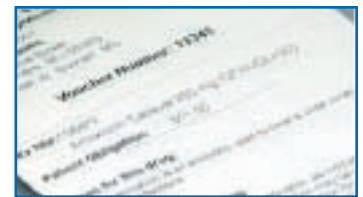

Information is received from the patient registration system using an HL7 interface and insurance card scanner.

**2 The prescription**

Once the patient has been seen, the prescriber enters the prescription electronically.

**3 Patient choice**

The patient chooses to fill their medication order on site at the *InstyMeds* dispenser or receives a printed prescription to take to a pharmacy.

**4 Insurance verification**

With the medication order, the system verifies coverage and adjudicates insurance claims. The system also accommodates self-paying customers.

**5 Easy touch-screen operation**

At the *InstyMeds* dispenser, the patient enters the prescription order number and birth date for validation.

**6 Payment options**

The patient enters a credit card, debit card or cash to cover the cost of the prescription or the co-pay.

**7 Rapid delivery**

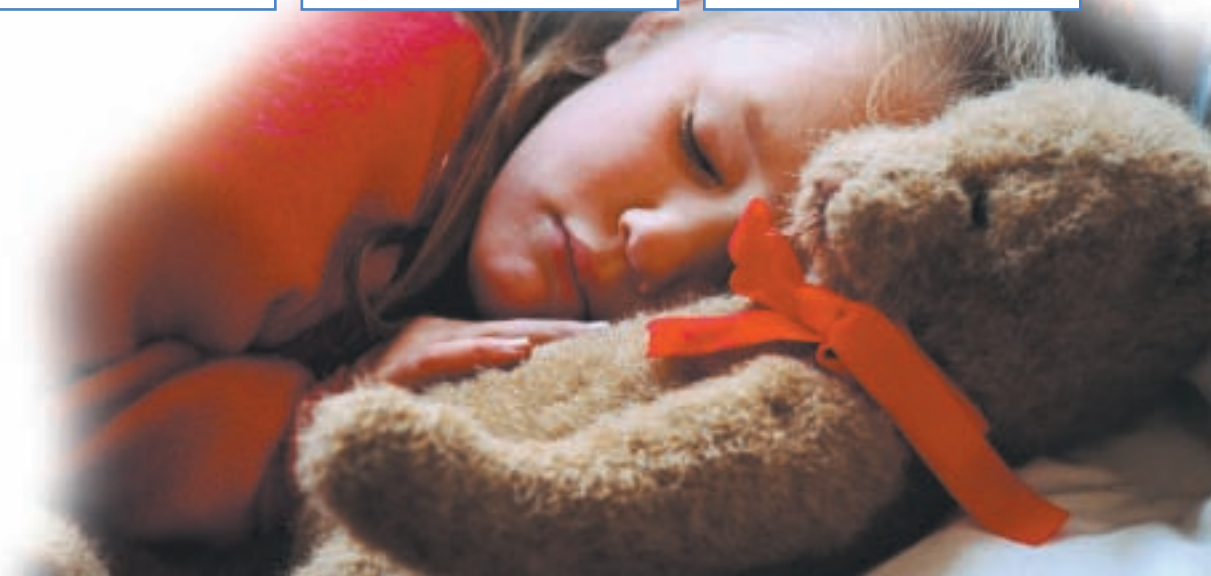

The medication is automatically labeled. A three bar code check system ensures that the right patient receives the right medication within 2 to 5 minutes.

**8 The result**

Patients receive safe, convenient, full prescriptions including printed patient education at the point of medical care.

# A Close-Up of the *InstyMeds* System

# *InstyMeds*

## Direct to Patient Medication Dispensing *at the Point of Care*

**Electronic Prescribing**  
Prescriber enters the prescription electronically.

**Patient Choice**  
Prescriber offers the choice of either an *InstyMeds* order with printed drug education or a printed prescription to take to a pharmacy.

**Insurance Billing**  
Insurance information is obtained at registration using a compact card scanner. HIPAA-compliant insurance verification is delivered in about five seconds.

**Inventory & Restocking**  
Includes space for up to 102 prescription and OTC medications in different size and shape containers. Orals, topicals, liquids, inhalers and drops can be dispensed. "Load anywhere" restocking with bar code verification eliminates restocking errors.

**Bar Code Safety & Accuracy**  
Three unique and automatic bar code reads ensure accurate drug dispensing that is safer than human package selection and labeling.

**Easy to Use**  
Large, color touch-screen features are user-friendly and easy-to-follow (wheelchair accessible).

**Patient Obligation**  
Payment is accepted via credit/debit card or cash.

**Medications Dispensed Quickly**  
Prescription and OTC medications are typically dispensed in two to five minutes.

**Patient Support**  
Telephone (mounted near the dispenser) provides a direct line to a 24-hour-a-day, 7-day-a-week support center staffed by pharmacists and pharmacy technicians.

### Would you like to...

- Provide prescription medication services around the clock?
- Discontinue starter packs that are costly and labor intensive?
- Provide patients a safe and convenient method for receiving their full prescription medications so they can return to the comforts of home as quickly as possible?
- Eliminate illegible, hand-written prescriptions that result in time-consuming callbacks?

### Now you can — with the *InstyMeds* System.

*InstyMeds* is the only fully automated, ATM-style dispensing system for outpatient prescription medication services. It is a complete and robust system that provides benefits to healthcare facilities, pharmacists and patients.

### Benefits

*InstyMeds* provides compelling benefits to hospitals, clinics, pharmacists and patients whether implemented as a cost control tool, a profit center, a system to reduce medication errors or as an additional service to patients.

#### • To Facilities/Pharmacists/Emergency or Outpatient Staff

- Reduces workload pressures
- Offers 24-hour service without additional staffing
- Eliminates expensive starter doses
- Reduces medication errors
- Enhances patient satisfaction and compliance
- Significantly reduces physician call backs
- Speeds patient discharge

#### • To Patients

- Obtain medications quickly at point of care
- Eliminates trip to pharmacy (often when sick or in pain)
- Extends availability of medications to 24/7
- Enhances safety and compliance
- Prices competitive with local pharmacies
